PKI Solutions Announces Year-End 'Pay Now, Learn Later' Promotion for PKI Training Courses
Self-paced courses help cybersecurity professionals hone their skills to successfully design, implement, and manage highly-secure Public Key Infrastructures

PORTLAND, Ore., Dec. 16, 2021 — PKI Solutions, the experts in Public Key Infrastructure (PKI) consulting and training, today announced a special year-end 'Pay Now, Learn Later' promotion for its popular online training courses including its Microsoft PKI In-Depth Course, Microsoft Active Directory Certificate Services (ADCS) Advanced Course, and 12-Month Self-Paced Online Training Subscription. Organizations and individuals can take advantage of the 'Pay Now, Learn Later' promotion by signing up by Friday, December 31, 2021, to reserve training courses and use end-of-year budget for 2021. These training courses can be taken any time during January, February, and March 2022, and users will be able to access the training courses for 90 days beginning whenever they decide to start the course during Q1 2022.

As organizations around the world become more dependent on online services and devices, the need to secure data, electronic transactions and vital information is more important and challenging than ever before. The foundational backbone of enterprise IT security for organizations is a PKI that is designed and managed by highly trained PKI professionals with the skills and knowledge to maintain the integrity of the organization's overall security.

"A robust and secure PKI designed and managed by skilled PKI professionals will help your organization protect and manage data today and for years to come," said Mark B. Cooper, president and founder of PKI Solutions. "But, even though PKI training is extremely important for your IT team, we also know that organizations are busy – particularly during the end of the year. If you have remaining budget in 2021 for training, but don't have time to actually do the training before the end of the year, then our 'Pay Now, Learn Later' program is ideal. We've built this coursework based on our many years of experience in the cybersecurity trenches and we want to help others build their

PKI knowledge base as well as increase their skills."

As part of its 'Pay Now, Learn Later' promotion, PKI Solutions is offering the following [courses](#):

[Microsoft PKI In-Depth](#) - **$2,995 for 90 days**

The ability to design and manage a Public Key Infrastructure (PKI) is highly dependent on the skills and knowledge of those who are managing it. That's why this self-paced Microsoft PKI in-depth course is so valuable. This course is a deep dive into PKI and Active Directory Certificate Services (ADCS) and focuses on helping you build your knowledge and skills with all of its features. There is a strong emphasis on security, best practices, and hands-on skills labs.

[Microsoft ADCS Advanced](#) - **$2,995 for 90 days**

This self-paced training course is recommended for anyone who has taken the Microsoft PKI In-depth training course or is already familiar with Microsoft ADCS and is comfortable in a lab environment working with Certificate Services.

[Self-Paced Online Training Subscription](#) - **$7,500.00**
PKI Solutions' subscription service allows you to access all courses online for a period of 12 months. Subscriptions are fully transferable to co-workers within the subscription period. Access is limited to the number of subscription seats purchased. You will have access to the [PKI In-depth course](#), [Microsoft ADCS Advanced](#) training, and any other online courses launched during your subscription.

To take advantage of PKI Solutions' promotion, which ends Friday, December 31, 2021, use code **PayNowLearnLater** at pkisolutions.com/training. For more information about PKI Solutions training, visit [pkisolutions.com/training](#).

About PKI Solutions
[PKI Solutions](#) offers PKI consulting, training, professional services, and assessments to help ensure the security of organizations now and in the future. With deep knowledge and experience in all things public key infrastructure (PKI)—Microsoft Active Directory Certificate Services (ADCS), PKI design and implementation, Internet of Things (IoT), mobile security—PKI Solutions has the best expertise for

organizations of all sizes. PKI Solutions has implemented PKI solutions at enterprises, many of them Fortune 500 companies. In addition, PKI Solutions has led hundreds of PKI trainings, including private trainings, across the country and around the world. PKI courses, taught by the company's founder and president, Mark B. Cooper, known as "The PKI Guy," are available online. More information about PKI Solutions is available by visiting https://pkisolutions.com/.
